MICHAEL R. STYLER
Executive Director

Division of Oil, Gas & Mining

JOHN R. BAZA
Division Director

JON M. HUNTSMAN, JR.
Governor

GARY R. HERBERT
Lieutenant Governor

Representatives Present During the Inspection:

OGM Priscilla Burton Environmental Scientist III

Inspection Report

Permit Number:	C0150032
Inspection Type:	PARTIAL
Inspection Date:	Tuesday, July 21, 2009
Start Date/Time:	7/21/2009 10:00:00 AM
End Date/Time:	7/21/2009 3:00:00 PM
Last Inspection:	Thursday, July 09, 2009

Inspector: Priscilla Burton, Environmental Scientist III

Weather: sun 70 F

InspectionID Report Number: 2070

Accepted by: jhelfric
8/4/2009

Permittee: **GENWAL RESOURCES INC**
Operator: **GENWAL RESOURCES INC**
Site: **CRANDALL CANYON MINE**
Address: **PO BOX 1077, PRICE UT 84501**
County: **EMERY**
Permit Type: **PERMANENT COAL PROGRAM**
Permit Status: **ACTIVE**

Current Acreages

6,235.80	Total Permitted
27.15	Total Disturbed
	Phase I
	Phase II
	Phase III

Mineral Ownership

- ☒ Federal
☐ State
☐ County
☐ Fee
☐ Other

Types of Operations

- ☒ Underground
☐ Surface
☐ Loadout
☐ Processing
☐ Reprocessing

Report summary and status for pending enforcement actions, permit conditions, Division Orders, and amendments:

The gate is locked with chain and cable. Within 100 feet of the gate there is a large fallen tree that blocks vehicle access. So I walked the length of the remaining access road over to the reclaimed emergency drill pads.

Inspector's Signature

Priscilla Burton

Priscilla Burton, Environmental Scientist III

Inspector ID Number: 37

Date

Wednesday, July 22, 2009

Note: This inspection report does not constitute an affidavit of compliance with the regulatory program of the Division of Oil, Gas and Mining.

REVIEW OF PERMIT, PERFORMANCE STANDARDS PERMIT CONDITION REQUIREMENTS

1. Substantiate the elements on this inspection by checking the appropriate performance standard.
 - a. For COMPLETE inspections provide narrative justification for any elements not fully inspected unless element is not appropriate to the site, in which case check Not Applicable.
 - b. For PARTIAL inspections check only the elements evaluated.
2. Document any noncompliance situation by reference the NOV issued at the appropriate performance standard listed below.
3. Reference any narratives written in conjunction with this inspection at the appropriate performance standard listed below.
4. Provide a brief status report for all pending enforcement actions, permit conditions, Division Orders, and amendments.

1. Permits, Change, Transfer, Renewal, Sale

The emergency pad and access road reclamation plan is found in Appendix 22-A of the MRP.

4.c Hydrologic Balance: Other Sediment Control Measures

Excelsior logs along access roads were photographed to show that most have been functioning adequately to hold sediment, but they will not serve another season and should be replaced for the next season, unless reclamation of the road takes place. The staircase installation of excelsior logs in the drainage on the slopes of the pad 6 access road has held very well.

10. Slides and Other Damage

There has been a slump on the SITLA access road in the location of the French drain. This slump is small and does not block access.

13. Revegetation

First year vegetation on pads 2, 6 and the access road has good cover that is predominantly Triticale. Second year vegetation on pads 3, 4, 5 and the reclaimed portion of the SITLA road is perennial grasses and forbs. The Triticale has been an excellent nurse crop. Areas needing further seeding might include the reclaimed access road to pad 6, composed by clay subsoil and even the Triticales is sparse, and an overlooked portion of the outslope of Pad 7 (about 20' X 10'). Any additional seeding should be done by hand, to minimize disturbance.

16.b Roads: Drainage Controls

The French drain on the access road to pad 3 is not functioning as designed. The water is bypassing the pipe and flowing overland. The pipe is an eyesore that should be removed. The slope appears stable in this location, but further stability could be provided by planting live plugs of scouring rush (*Equisetum* sp.) or other wetland species.
